Cover Letter

Good day Hiring Team or Whom it may Concern,

I am writing to express my keen interest in the Software Engineer/Web Developer position recently advertised. With a bachelor's degree in computer science and 3-5 years of hands-on experience in web development, I am enthusiastic about contributing my skills to a dynamic team.

In my previous role at Sunbird DCIM, I developed and maintained React Firebase applications, showcasing my proficiency in Python, JavaScript, and Visual Basic. Additionally, my background in translating designs into user-centered websites, coupled with expertise in Python, HTML, CSS, JavaScript, equips me to meet the challenges of your position.

During my tenure in the US Navy, I honed my collaboration, communication, and task accountability skills. My military background instilled in me a strong sense of discipline, time management, and leadership, enabling me to excel in both independent and team-oriented projects.

I am particularly drawn to opportunities that encourage innovation and responsible problem-solving. My dedication to delivering high-quality results, paired with my passion for cutting-edge web development, positions me as a valuable asset to any team.

Enclosed is my resume for your consideration. I would appreciate the opportunity to discuss further how my skills align with the needs of your team. Thank you for considering my application. I look forward to the possibility of working together.
